SUMMARY

- **Associate Software Developer in Test** with over **3 years** of experience in **performance** and automated testing in **JMeter**, **Load Runner** ensuring scalability in web and mobile test suites, improving deployment efficiency in **Cloud ORM** frameworks.
- Driving key performance initiatives at **Tecsys Inc.** by designing and executing comprehensive load tests, automating testing pipelines, monitoring system behavior under stress, and deploying scalable solutions through **Docker** containers on **AWS**.
- Strong knowledge in **relational database management**, creating data-driven test strategies and **test script** development, contributing to high-quality, robust solutions through effective collaboration, teamwork, and communication in client projects.

EDUCATION

Master of Applied Computing

Sep 2023 - Dec 2024

University of Windsor, Windsor, Ontario with **8-month intern** experience

- **Coursework:** Advanced Software Engineering, OOPS, Data Structure, Algorithm Design, Networking, Database Systems.

Bachelor of Engineering in Computer Science

Aug 2017 - Jun 2021

Sri Venkateswara College of Engineering, Chennai with **94% CGPA**

TECHNICAL SKILLS

- **Programming Languages:** Java, XML, SQL, C++, JavaScript, TypeScript, Groovy
- **Frameworks:** Selenium, React JS, Angular, Spring Boot, HTML, CSS
- **Tools:** JIRA, Confluence, Git, Datadog, Eclipse, JMeter, Load Runner, DBaiver, Junit, Postman, SOAP, REST API
- **Database Technologies:** MySQL, MongoDB, Firebase, Oracle SQL, PostgreSQL.
- **Added Skills:** Docker, AWS EC2 Instance, Deep Learning, Cloud Computing, CI/CD, Test Automation Frameworks.

WORK EXPERIENCE

Associate Software Developer in Test

Sep 2024 – PRESENT

Tecsys Inc., Montreal, Canada

- Experienced in creating performance test scripts for **Supply Chain ERP SaaS** using JMeter, improving the framework's capacity from **400 to 700** concurrent users by automating **SOAP API** calls, identifying bottlenecks, and improving query performance.
- Followed **JIRA** tracking and incorporated UI automation using **selenium web drivers** to construct functional test components reducing the manual workload around 70% and monitored the system logs using **Datadog** to improve response times.
- Contributed to the development of **SWIFT**, a scalable **SaaS testing tool** designed to replace JMeter, enabling test execution, monitoring, and reporting within a unified framework while documenting processes and findings in **Confluence** for knowledge sharing and continuous improvement.

Quality Engineer

LTIMindtree, Chennai, India

Nov 2021 - Jul 2023

- Engaged in **performance testing** for SAP application for **5000 concurrent** user loads, reducing application response times by 20% and increasing application efficiency by removing the bottlenecks.
- Led a **team of 6** to test cloud migration of Oracle application, delivering ahead of schedule enhancing performance by 30% by load testing, utilizing **Jenkins** for CI/CD, with strong initiative and the ability to manage multiple **tasks under tight deadlines**.

Software Developer

Jun 2021 - Nov 2021

LTIMindtree, Chennai, India

- Engineered a team to develop a **Vehicle Loan Management** system, integrating **Docker and Oracle SQL**, resulting in a 40% increase in uptime, 20% faster data retrieval, and enhanced loan processing speed.
- Applied Agile **SCRUM** methodologies and conducted comprehensive code reviews, enhancing code quality and collaboration, which led to continuous performance improvements and reduced bottlenecks.

NOTABLE PROJECTS

Food Price Analysis

Jan 2024 – Mar 2024

University of Windsor | [FPA_GitHub](#)

Tech Stack - Java, Selenium, MongoDB, ReactJS, Spring Boot, Maven

- Built a scalable **food deals analysis app** using **Java and Spring Boot**, ensuring stability under load. Implemented **Selenium** and **Maven tests**, reducing bugs by **30%** and improving the experience for **5,000+ users** as an alternative to FLIPP application.

Vehicle Loan Management System

LTIMindtree | [VLS_GitHub](#)

Tech Stack - Angular, Java, Spring Boot, Hibernate, Eclipse, Postman, Restful API,

- Developed a **vehicle loan management system** using **Java, Spring Boot**, and **RESTful services**, automating and speeding loan approval efficiency by **40%**. Built user/admin modules in **Angular**, using **SOAP web services**, boosting throughput by **25%**.

PAPER PRESENTATION

Thoughts to Text/Speech via Brain-Computer Interface.

Oct 2023 – Dec 2023

University of Windsor | [BCI_GitHub](#)

- Developed a **Brain-Computer Interface (BCI)** system using **CNN and Bayesian Decoding**, translating brain signals into text/speech with **90% accuracy**. Improved signal precision through feedback mechanisms, testing on **100 diverse brain signals** to enhance accessibility for individuals with disabilities.
